

DID YOU KNOW?

A qualified Salvage Drum meets or exceeds the key features defined in Department of Transportation Regulation 49 CFR 173.3 in the following critical ways:

- Meets or exceeds UN performance requirements and is marked for Packing Group 1.
- Passes a 3-psi pressure test.
- Is marked with the specific words "salvage" or "salvage drum."
- Passes extensive Drop and Stack testing.

95 GALLON POLY-OVERPACK® SALVAGE DRUM

THE FUTURE OF SALVAGE DRUMS

Taking industry standards to a whole new level, ENPAC introduces the newest 95-gallon overpack and salvage drum. Engineered with safety in mind, the innovative 1095-YE stacks, locks, and transports more securely and efficiently than any other drum in the market.

Stacking two drums? These drums are specifically designed to lock once stacked as a preventative safety measure for both your employees and product.

Now ships in 4 packs with 4 lids saving both space and transportation costs.

Nesting lids create a safer and stronger nested stack for storage.

All new design allows for two tightening bars making this product more user friendly than any on the market!

With a double start thread, the 1095-YE only requires half a turn to tightly secure your leaking drums.

NEW!
